Subject: Water Scarcity – Apology for Inconvenience Caused

Dear Parents,

We regret to inform you that due to an ongoing water scarcity issue, we have been facing significant challenges in maintaining adequate water supply within our school premises.

Despite our efforts, the lack of sufficient rainfall has resulted in the drying up of our bore wells. Since the Month of May, we have been grappling with this issue, spending approximately **₹10,000 per day to procure water.** Unfortunately, even with this expenditure, **water remains scarce, especially today in the new block of our school.**

To manage this situation, **we have temporarily directed our students to use the old block washrooms,** where we are still able to maintain a basic water supply. We understand this may cause inconvenience and disruption to the regular routine, and for this, we sincerely apologize.

We deeply appreciate your understanding and continued support during these challenging times. Please be assured that we are doing everything in our capacity to resolve this issue as swiftly as possible.

Thank you for your patience and cooperation.

Warm regards,
STEM School
