Notice

15th November 2024

Subject: Usage of Air Conditioners in class rooms – Reg.

Dear Parents,

Greetings from STEM School!

Seasonal change in the incidence of infectious diseases is a common phenomenon in both temperate and tropical climates. However, the mechanisms responsible for seasonal disease incidence, and the epidemiological consequences of seasonality, are poorly understood with rare exception.

As we have entered the Winter Season and Daytime temperatures are falling down, a few children are suffering with Running Nose, Cough & Cold.

Therefore, to prevent the risk of spreading, the STEM School Management has decided **not to use air conditioners** from **November 18, 2024, to January 15, 2025,** while classes are in session.

Note: We will turn on the air conditioners if the outside temperature crosses 30 degrees.

Kindly Understand the situation and please do cooperate.

Regards,

Principal & Correspondent.
